Dear Mrs Olutosin Costa,

URGENT FORMAL COMPLAINT: Electricity Disconnection, Gross Negligence, Misrepresentation, and Misconduct by Your Agent Miss Oluwatoyin Olamoyesan

Property: Bungalow 2b, LSDPC Phase 4, Type C, Ijaiye Ogba, Lagos.

I am writing to formally document a critical escalation in the mismanagement of my tenancy. Despite my previous attempts to address ongoing issues, the property has now been **disconnected from the electricity grid** due to the gross negligence of your caretaker, **Miss Oluwatoyin Olamoyesan**.

As the property owner, you are legally liable for the actions and omissions of your caretaker(**Vicarious Liability**). I am bringing the following grievances to your immediate attention:

1. EMERGENCY: Disconnection and Endangerment of a Vulnerable Person

The property is currently without power due to your caretaker's failure to secure the installation of a prepaid electricity meter. This has created a hazardous living environment for my elderly mother, who resides in the property. The lack of electricity significantly compromises her health, safety, and basic daily needs. Please be advised that, given the vulnerable nature of my mother, **I will not hesitate to hold you personally and legally responsible for any harm, injury, or adverse medical outcomes that result from your misconduct.**

2. Fraudulent Misrepresentation Regarding Electricity Metering

Before the commencement of this tenancy, I was explicitly assured that a functional prepaid meter had been applied for and was awaiting installation. It is now evident that this was a fraudulent misrepresentation used to induce me into the tenancy agreement. The absence of a meter has subjected me to "estimated billing," which is financially punitive and inaccurate.

3. Collusion and Extortion (Electricity Billing)

There is clear evidence of collusion between your caretaker and utility officials. I have been presented with unsubstantiated electricity bills that do not reflect actual consumption. Furthermore, the caretaker has used the threat of disconnection as a tool for intimidation. This constitutes a severe breach of the **Covenant of Quiet Enjoyment** and amounts to harassment under both UK and Nigerian standards of property law.

4. Negligence Regarding Waste Management Arrears

The caretaker has failed to settle outstanding waste management debts incurred before my occupancy. This negligence exposes the household to:

- Statutory fines from the relevant waste management authorities.
- Disconnection of essential services.
- Health and safety risks and avoidable conflict with neighbours.

5. Breach of Landlady's Duty of Care

Your failure to supervise your caretaker or intervene despite being made aware of these issues constitutes a breach of your duty of care. By allowing this conduct to persist, you are effectively endorsing the financial exploitation and mismanagement taking place.

Required Remedial Actions:

To avoid further escalation and the initiation of formal legal proceedings in **Nigeria and the UK**, as well as formal reports to **senior citizen protection organisations and human rights commissions**, I require the following within **seven (7) working days** from 19.12.2025:

1. **Immediate Reconnection:** Ensure the property is reconnected to the electricity grid immediately at your expense.
2. **Clearance of Waste Debt:** A receipt showing all pre-tenancy waste management arrears have been paid in full.
3. **Cease and Desist:** A written guarantee that the caretaker will cease all unauthorised contact with utility officials regarding my specific billing.
4. **Refund of Overpayments:** A refund of **₦361,795.28** (representing the overcharged portion of the **₦401,795.28** total paid in September and October 2025 due to the lack of a meter.

I look forward to your immediate intervention to resolve these matters and restore a professional standard to this tenancy.

Yours sincerely,

Olarinde Ajai
